

Plastic Bottle Fly Trap

In general, there are plenty harmful insects in the farm site, especially the flies. This topic is how to make the economical flytrap for the farmer. It is cost free & very easy to make.

This is for using out door only due to smelling bait. Actually, according to user, they get plenty flies as full plastic bag for few days.

Materials;

- Ø Plastic bottle of transparent. 1l or bigger is better.
- Ø Small plastic bottle such as Yakult bottle.
- Ø Black cover such as coffee bottle cover.
- Ø Adhesive
- Ø Wire

Directions;

- 1) Open the hole on the Yakult bottle by wire. Determine 8mm; make the bait stopper at the entrance.
- 2) Draw the circle at the plastic bottle by the pen for setting up Yakult bottle inside.
- 3) Open the hole beside the circle written by the burned wire. Make several cut end due to Yakult bottle should be stopped naturally at the bottom.
- 4) Open the others hole at the bottom of the plastic bottle for hanging wire.
- 5) Open the hole for the cover and set up the cover. Below space is about 8mm.
- 6) Put the Yakult bottom into the plastic bottle and fix. Also fix the back by the adhesive.
- 7) Set up the plastic bag at the bottom.

Using

1. You should use out door of under the sunshine.
2. About the bait, smeller is best. The flies like wet & smell bait.
