

Vision 2006

The current goal within year 2005 I am setting is to become the best internet source for both financial practitioners and academic economists, from a student or a tech to a famous professor, all over the world. I do floor "GAUSS Archive" site with no mercy. Then, there is no doubt whatsoever that my codes are going to "virtually" have some strong latent impact on papers and books that are going to be published in "real" world. I hope there will be no distinction between "virtual" and "real" by year 2006.
